A screenshot of a Linux desktop environment, likely Ubuntu, showing a terminal window titled "Terminal". The window displays the output of several "apt-get" commands. The first command, "sudo apt-get update", shows that the "Google LLC" repository has changed its origin from "Google, Inc.". The second command, "sudo apt-get install texstudio", is shown at the bottom. The desktop background is dark, and the Unity interface is visible at the bottom with various application icons.
