Unit-1

<mark>Fundamentals of computers</mark>

Introduction:-

Computers are seen everywhere around us, in all spheres of life. May it be the field of education and research, travel and tourism, weather forecasting, social networking, ecommerce or any other, computers have now become anindispensable part of our lives.The manner, in which computers have revolutionized our lives because of their accuracy and speed of performing a job, is truly remarkable. Today no organization can function without a computer. In fact various organizations are trying to becomepaper free owing to benefits of computers. But the computers of today have evolvedover the years from a simple calculating device to the portable high speed computers that we see today.

• *Definition of Computer:-*

Computer is an electronic data processing device which accepts and stores data input, processes the data input, and generates the output in a required format.
